Small Cap Value Commentary

1st Quarter 2024

Equity markets posted positive returns during the 1st quarter of 2024. For the quarter, the Russell 2000[®] Value (R2V) Index increased +2.90%, and the Russell 2000[®] Growth (R2G) Index was up 7.58%. The spread between large cap and small cap returns continued to widen, with the Russell 1000[®] Index (large) returning +10.30%, compared to the Russell 2000[®] (small) up +5.18%.

The Kennedy Capital Small Cap Value (SCV) composite increased 5.51% (net of fees) during the quarter, outperforming the R2V by 2.61%. For the rolling 12-month period, the SCV composite returned 23.31% (net of fees), compared to the R2V's return of 18.75% outperforming by 4.56%. Additional performance information included in the table below.

	1 Year	3 Years	5 Years	10 Years	Since Inception
Gross	24.39%	8.22%	12.81%	9.56%	15.12%
Net	23.31%	7.28%	11.82%	8.59%	14.09%
Index	18.75%	2.22%	8.17%	6.87%	10.90%

Data as of 3/31/2024

Within the SCV composite, stock selection in the Industrials, Consumer Discretionary, and Health Care Sectors were the biggest drivers of positive relative returns (vs. the R2V). These sectors added 178, 63, and 44 basis points, respectively, to 1st quarter relative performance. On the downside, Energy, Information Technology, and Financials were the three worst-performing sectors on a relative basis. These sectors negatively impacted 1st quarter relative returns by 26, 17, and 9 basis points, respectively.

Economic conditions remained stable in Q1 2024. Labor market conditions remain healthy, with the unemployment rate hovering near multi-decade lows. The industrial economy is showing signs of improvement, as evidenced by the ISM Manufacturing Index in March, breaking above 50 (readings >50 typically indicate expanding industrial activity) for the first time since October of 2022. Consumer spending, particularly in areas such as housing, remains steady.

Inflationary pressures have moderated relative to the highs reached in 2023, but are still elevated. The Consumer Price Index ("CPI") rose +3.2% in February, consistent with January, and above the Federal Reserve's target inflation rate of 2.0%. The combination of stubbornly high inflation (relative to target levels) and steady economic activity is supportive of restrictive monetary policy and higher interest rates over the near term. In response to the economic data, the yield on 10-year treasuries rose over 30 basis points in the first quarter, and market expectations for Fed rate cuts in 2024 have been scaled back. So far this year, equity markets have been unfazed by the specter of "higher-for-longer" interest rates. Time will tell.

While reports of the S&P 500® Index hitting all-time highs dominates headlines, small cap stocks are still below their 2021 peak. Furthermore, over the last 10 years, returns for the Russell 2000® Index have lagged the S&P 500® by over 5% per annum. As a result of this performance gap, relative valuation between small caps and large caps is the widest its been in decades. We believe the long-term investment opportunity in small caps remains bright, especially for fundamental investors with a proven framework to identify situations where equity valuations do not adequately reflect the value-creation potential of the underlying businesses.

We welcome the opportunity to discuss any questions or concerns you may have, and we thank you for the opportunity you have given us to manage your account.

Sincerely,

Frank Latuda, Jr. CFA®

Important Disclosures

Kennedy Capital Management LLC (“KCM”) is a Delaware limited liability company headquartered in Missouri. KCM is registered as an investment adviser with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration with the SEC does not imply any level of skill or training. Clients of the Firm include U.S. corporations, pension and profit sharing funds, colleges and universities, trusts, not-for-profit organizations, foundations, and individuals. KCM claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. GIPS® are a set of standardized, industry-wide ethical principles that provide investment firms with guidance on calculating and reporting their investment results to prospective clients to ensure fair representation and full disclosure of an investment firm’s performance history.

Although the statements of fact and data in this report have been obtained from, and are based upon, sources that the Firm believes to be reliable, we do not guarantee their accuracy, and any such information may be incomplete or condensed. All opinions included in this report constitute the Firm’s judgment as of the date of this report and are subject to change without notice. This report is for informational purposes only and is not intended as an offer or solicitation with respect to the purchase or sale of any security. A complete list of all securities recommended by KCM in the preceding year, a fully compliant GIPS composite report, and the list of composite descriptions are available upon request from KCM at 10829 Olive Blvd., Suite 100. St. Louis, MO, 63141.

The Small Cap Value Composite invests in small cap companies that have favorable cash flow values relative to their current market value. For comparison purposes the composite is measured against the Russell 2000® Value Index. The U.S. Dollar is the currency used to express performance.

Composite specific data provided within this presentation has been calculated from accounts that are discretionary as defined in this paragraph. The assets shown are derived only from discretionary accounts. Non-discretionary accounts, as defined by KCM, are accounts that are not included in the composite due to one or any combination of the following criteria: there were significant

cash inflows or outflows within the account; the account's asset level did not meet the minimum requirement to remain in the composite; the account assets are managed by others using our non-discretionary model. The temporary removal of such an account occurs at the beginning of the month and the account re-enters the composite the month after the criteria has been met.

Performance returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross of fee returns reflect the deduction of transaction costs and custodian fees but do not reflect the deduction of investment advisory fees. Net of fee performance is calculated using gross returns less the actual applicable annual management fee applied monthly.

Past performance is not indicative of future results. A client's return will be reduced by the advisory fees as described in Form ADV Part 2A and other expenses incurred by the account. For example, an annual advisory fee of 1% compounded quarterly over 10 years will reduce a gross 14.44% annual return to a net 13.32% annual return. Form ADV Part 2A is available upon request.

The performance figures reported herein are unaudited, may be based upon information obtained via electronic data sources ("feeds") and may be subject to change. Data feeds from many of KCM clients' selected custodians are obtained through third party sources, and are used to compare custodial data to KCM's client account records as frequently as daily. Monthly, KCM reviews clients' account holdings along with cash and share quantities against the custodial statements. In some instances, variances may exist between final audited custodial information and the information KCM obtains via such data feeds. Generally, any such variances are researched and reconciled within thirty days of the period end.

The information provided should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in a KCM portfolio at the time you receive this letter or that securities sold have not been repurchased. Allocations among industries, sectors and securities may vary and are subject to change without notice. Any securities discussed do not represent an account's entire portfolio and, in the aggregate, may represent only a small percentage of an account's portfolio holdings. It should not be assumed that any of the industry or sector allocation decisions mentioned, or securities transactions or holdings discussed were or will be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

Sector Weightings are subject to change at any time. Sectors are based on the Global Industry Classification Standard ("GICS") classification scheme and are measured as a percentage of the total composite in terms of asset value as of the date indicated above. Individual client portfolios may be different based on variations in security purchase price and date, and individual client restrictions.

GICS was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International, Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for the use by KCM. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Allocations to various assets classes change over time and deviate from any stated or targeted percentages of a total portfolio as a result of market conditions and reallocation decisions. Therefore, nothing herein reflects a static portfolio allocation that will remain the same or match stated target allocations of asset classes.

The Russell 2000® Value Index measures the performance of small-cap value segment of the U.S. equity universe. It includes those Russell 2000 companies with relatively lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and

lower sales per share historical growth (5 year) . The Russell 2000® Value Index is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics.

The Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000® Index is a subset of the Russell 3000® Index representing approximately 7% of the total market capitalization of that index, as of the most recent reconstitution. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000® companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 year). The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

The Russell 1000® Index measures the performance of the large-cap segment of the US equity universe. It is a subset of the Russell 3000® Index and includes approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 represents approximately 93% of the US market. The Russell 1000® Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are included. The Russell 2000® Value Index is used as the benchmark. The Index is unmanaged and represents total returns including reinvestment of dividends. The benchmark is used for comparative purposes only and generally reflects the comparable risk or investment style of the Firm's strategy. The investment portfolios underlying the Index are different from the investments in the portfolios managed by the Firm. Certain accounts may also use other benchmarks not listed in the GIPS composite report. The Verification and Performance Examination Report does not cover the benchmark returns included in the GIPS composite report. **Investors cannot invest directly in an index.**

The S&P 500® is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization.
